Airport Touch Screen Monitors are seen and touched by thousands of travelers every day!

CLEANSCREEN™

Antimicrobial, Scratch Resistant Film Overlay for Touch Screen Monitors with Advertising banner print space. Keep touch screen monitors clean while adding an important level of antimicrobial safety to the surface of the film.

Inhibits the growth of:

- Bacteria
- Mold
- Mildew
- Fungus

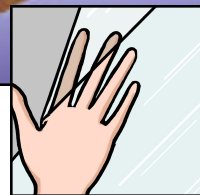

Prevents the spread of harmful bacteria by using on touch screen monitors in Schools, Restaurants, Hospitals, Banks, Libraries, and on Kiosks.

Protects touch screen monitors from scratches, dirt and fingerprints.

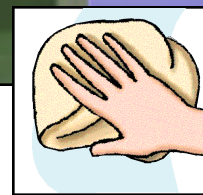

Wipe clean or simply replace film to keep touch screen monitors looking new and sparkling clean.

Advertising banner print space available on every screen.

Samaritan CLEANSCREEN Antimicrobial film is easy to apply. Remove adhesive backing material on 4 corners and place film over touch screen monitor. Lightly press four corners to secure to monitor. To remove film gently pull corners away from monitor. Apply pre-cut sheets to touch screen monitor panel for long lasting antimicrobial protection. Simply wipe clean using soap and water. Or replace using recorded replacement date label to keep touch screen monitors looking new and sparkling clean.
