

ANTIMICROBIAL POLYDYNAMIC POLYURETHANE FLOOR FINISH

PRODUCT FEATURES:

Polydynamic is a single component water-based aliphatic coating. Nano-Silver technology has been integrated into the Polydynamic blend to create an antimicrobial resistant finish. Nano-Silver Technology has been proven effective to combat the growth and migration of harmful bacteria and viral pathogens. Polydynamic can be applied by roller, brush, or spray and shows good adhesion to several substrates including spray elastomers, wood, concrete, and metal. Polydynamic has excellent wear resistance, and excellent resistance to mild acids and solvents, along with resistance to chalking and color changes. Polydynamic is fast curing, has low VOC's and forms a nonporous film. Polydynamic exhibits excellent non-slip and wear resistance.
